

## > GARAGE DOOR INSULATION

- > Reduces heat losses
- > Very light (no need the adjust the door lifting system)
- > Clean and washable finish
- > R6 thermal resistance value
- > Pre-cut kits now available for single and double doors

Product recommended  
AYR-FOIL™ A2A

### INSTALLATION METHOD:

- 1 Cut **AYR-FOIL™** strips (1.5" wide) to create the air space.
- 2 Install the strips on the door with double faced adhesive tape for metal doors (staples for wood doors) as shown above. Put strips on each mobile panels of the door.
- 3 Stick **AYR-FOIL™** to the strips with tape or staples.
- 4 Seal the seams with **AYR-FOIL™** aluminum tape.
- 5 Install strips of **AYR-FOIL™**, between every mobile panel of the door. Make sure these strips are stuck only at the upper panel side and are wide enough to stay over the lower part while the door is open.
