

## WATER PIPE AND AIR DUCT INSULATION

- > R6 with spacer strips
- > Prevents condensation
- > Reduces noises and vibrations
- > **Equivalent to more than 1" of fiberglass**
- > Not affected by moisture and water
- > No allergenic or harmful content
- > Washable
- > Ideal for air conditioning or heating duct
- > R4.3 without spacer strips
- > Installation method is also available for R-8. Contact us.

**AYR-FOIL™ A2A**  
> For pipe smaller than 2", you do not need to use AYR-FOIL™ strips.

**AYR-FOIL™ pipe wrap**

### INSTALLATION METHOD:

- 1 Install around the pipe a 2" wide **AYR-FOIL™** strip (two thicknesses) at every 16" to create an air space.
- 2 Wrap the **AYR-FOIL™ A2A** around the strips and cut it to overlap approximately 1". Fit it to get over circumference joints over the strips.
- 3 Seal the seams with **AYR-FOIL™** aluminium tape.

P.S. Do not use this method to insulate fresh air intake and exhaust duct.
