

POST-FRAME / POLE BUILDINGS

AYR-FOIL™ helps to solve or limit two of the major problems associated with post frame buildings: AYR-FOIL™ reflective side prevents heat gain in the building providing a more comfortable environment for workers or livestock. Its bubble pack also creates a thermal break to reduce condensation problems. Furthermore the white polyethylene side is easy to clean and provides a bright shiny look.

Ask our technicians
for the R value
of your installation

Up to R15 in the summer

- › Perfect vapor barrier.
- › Great sun barrier to prevent overheating in the barn and protect the animals.
- › Clean and washable finish.
